

Skills for Hire
Data Analyst Program
Week 5

- 1) Learn python from Scratch: <https://www.w3schools.com/python/>
- 2) How to setup google colab.
 - Go to <https://colab.research.google.com/>
 - Click on File -> New notebook
 - Rename “untitled1.ipynb” to name of your choice
- 3) How to install python
 - Go to <https://www.python.org/downloads/>
 - Click on download python 3.10.7
 - Once [python-3.10.7-amd64.exe](#) is downloaded, click on install now
 - Go on cmd (command prompt) to check if python is downloaded or not
 - Write python3 --version
 - This opens python in interpreter mode (basic calculations and other stuff)
- 4) Let's download Visual studio code
 - Go to <https://code.visualstudio.com/>
 - Click on download for windows/mac
 - Click on open folder
 - Create a folder on desktop
 - Create a .py file by clicking on the icon circled.

- Run python script by clicking on the run button circled as below
